C. G C D G
Projects driving me up the wall
G C D G
Always afraid I might fall
G C D G
Taking on too much takes gall
G C D G
Thankfully I've learned to stay on the ball

1. F G C A^m
One year of 2D seismic interpretation
F G C A^m
A small retainer connecting two nations
F G C A^m
An 8,250 kilometer fence unifying stratigraphy and structure
F G C
Spreading centers, basin floor fans, geologic rapture

2. F G C A^m
Two years building models for prestack depth migration
F G C A^m
With a monthly salary keeping us on a ration
F G C A^m
750,000 acres and 14 fields
F G C
Working to see what all of this yields

3. F G C A^m
Three years of rentals on two North Padre Island Blocks
F G C A^m
Disrupted by Macondo and annual rental clocks
F G C A^m
Kept alive by German tenacity with an anger downside
F G C
Lost and found this project may abide

4. F G C A^m
Four years striving to fund a rank wildcat well
F G C A^m
Even with the Gronnigen analog it is hard to sell
F G C A^m
50 TCF potential seems way too big
F G C
So we have no investors for this gig

5. F G C A^m
Five years starting to unravel a new geophysical data type
F G C A^m
Conservative exploration managers see our results as hype
F G C A^m
We keep plugging away finding new proof
F G C
Our ideas are solid and won't go poof
