- C.            E                    A                    B  
 Ah-00000      Ah-00000      Ah-00000
1.            E                    A                    E  
 Changes in mineralogical composition of a rock  
 A                    D                    A  
 Brought about by physical or chemical means  
 B                    E                    B  
 Especially by the action of hydrothermal solutions
2.            E                    A                    E  
 Sometimes considered a phase of metamorphism  
 A                    D                    A  
 Yet usually distinguished from metamorphism  
 B                    E                    B  
 Because of being milder and more localized
3.            E                    A                    E  
 Changes in the chemical composition  
 A                    D                    A  
 Changes in the mineralogical composition  
 B                    E                    B  
 Changes caused by weathering
