1. G G
The universe is old The universe is cold
G G
And from what I'm told The universe will fold
C G
On itself over time

G G
And when it does It follows eternal laws
G G
Passing worlds buzz Simply because
C G
They are things to be acted upon

C G
C. Then comes the collision Of two worlds
C G
As time and space merge together

2. G G
Solar Systems grow With planets in tow
G G
How do I know What gravity will sow?
C G
On itself over time

G G
Mathematical models Give processes titles
G G
As planetary rotation idles Changing path vitals
C G
They are things to be acted upon

C G
C. Then comes the collision Of two worlds
C G
As time and space merge together

3. G G
Worlds pass by As through space they fly
G G
Why do I sigh? Because Earth may die
C G
By itself over time

G G
Colliding with the Earth It gave birth
G G
Creating lunar girth Something of great worth
C G
They are things to be acted upon

C G
C. Thus came the collision Of two worlds
C G
As time and space merge together

4. G G
The dinosaurs were lost At an astroid's cost
G G
Who am I? Just planetary dust tossed
C G
Quickened with spirit over time

G G
The dust from impact Eventually fell back
G G
Creating water lack The desert became a fact
C G
Because they are things to be acted upon

C G
C. Then comes the collision Of two worlds
C G
As time and space merge together
C G C G
As time and space merge together
